Heidelberg/New York, March 14, 2022 – Heidelberg-based IT service provider Heidelberg iT Management GmbH & Co. KG is now also present in the United States. Heidelberg iT is a cloud provider, internet service provider and IT system house with its own data centers. The recently founded subsidiary "Heidelberg iT Corporation" will cooperate with partners in the USA and offer IT consulting, conception and project management in the field of information security as well as IT security services for companies and organizations.

"We look forward to building our presence in the U.S. to work more closely with our current and future partners and collaborate on solutions that help organizations run stable, secure IT infrastructures," said Matthias Blatz, Managing Director of Heidelberg iT. "New York is the perfect location for us to establish our international activities in data centers, smart metering, networking, information security and IT security in the American market."

One of the aims of founding the company in the USA is to enhance the already excellent cooperation between Heidelberg iT and Convergint Technologies LLC (Schaumburg Illinois) and to establish it on the US market. Convergint is a global systems integrator that works with a worldwide network of partners and manufacturers to design, install and maintain security, communications, installation, fire alarm security and building automation systems for enterprise customers.

Due to Heidelberg iT's experience and specialization in the field of network technology, Convergint, formerly SigNet Technologies, has already successfully implemented numerous smart metering projects in Germany with the help of the IT experts from Heidelberg. Blatz expressed his great appreciation for the valuable cooperation with the German American Chamber of Commerce (GACC) in New York City for the start-up consulting and the opening of the Heidelberg iT office. "We are proud to be able to offer our services with Heidelberg iT Corporation in the US market with immediate effect, based in New York," he said.

Heidelberg iT Corporation's business presence is located within the GACC's offices in the Financial District in New York City:

About Heidelberg iT

Heidelberg iT Management GmbH & Co. KG is a leading IT service provider in the Rhine-Neckar metropolitan region and, as a cloud and data center provider, internet service provider and IT system house, combines the core competencies in information and telecommunications technology all under one roof. The IT infrastructure service provider operates its own fiber-optic network with a connection to DE-CIX Frankfurt and secure, high-availability data center units, including the "Serverhotel 2" with TSI certification from the TÜViT/TÜV Nord Group at the company's headquarters in Heidelberg (Germany). Since 2022, the company has been represented by its subsidiary Heidelberg iT Corporation in the business areas of data centers, smart metering, networking, information security as well as IT security in the USA.

Heidelberg iT supports enterprise customers to successfully implement digitization projects as also in information security and IT security tasks. The repertoire of services includes individually tailored solutions in the areas of cloud computing, managed services and IT outsourcing, as well as IT consulting and IT services relating to infrastructure, networks, WLAN, the Internet and telephony. In addition, the IT experts can also handle the procurement of hardware, software and accessories for individual workstations or home office workstations, right through to the entire server and IT infrastructure.

Heidelberg iT's customers include medium-sized companies, non-profit organizations and social institutions, high-data volume service providers, IT departments of corporations, and small businesses. For private customers, Heidelberg iT designs and implements smart home projects and multimedia concepts.
